

Summer Sun Art Activity

Instructions

1. Split the page into four quadrants as seen on the accompanying page.
2. Draw a large circle encompassing the corner of the four quadrants.
3. Shade in the line and make sure the sun is prominent.
4. On the circle draw in two eyes, a nose and a mouth to add to the face of the sun.
5. Add additional facial features such as eyelashes and cheeks to add life to the sun.
6. On each of the four quadrants, design different shaped rays from the sun. For example, in one quadrant you might have octopus arms and in another you might have pointy hedgehog pricks.
7. When finished with each quadrant, colour your sun's quadrants in different colours using paint or pastels.
